# ABOUT COMPANY

“ The Super Group was founded in the year 1965 with an aim to serve the huge industry with its high-tech products. The Company Started With a View to Make People's Lives More Comfort, Safer and More Secure. As The Business Started to Take its own shape, We Expanded Its Scope By Entering Into The Sphere Of Home Automation. Our utmost concern is to offer you our top quality, highly effective and elegantly designed Products for your domestic as well as commercial application

a r e a . ”

 Rolling Shutter With Wicket Doors  
 Shutter Gate-Vertical Gate  
 Polycarbonate Rolling Shutters

## ENTRANCE AUTOMATION

Sliding Gate  
 Boom Barriers  
 Sectional Garage Door

Swing Gate  
 Industrial Sectional Door  
 High Speed Door

## ROLLING SHUTTER

Rolling Shutters are manufactured from best heavy steel strips interlocked and hinged for maximum strength. These Shutters are fitted with best and well tested coiled springs for smooth operation. We manufacture the fine finished product range in various sizes which reflect beautiful appearance and assure complete protection and high resistance power against wind, rain, burglary, thefts and riots etc.

## SHUTTER GATE - VERTICAL GATE

Shutter Gate is specially designed for where the height of the entrance is too short or places where the width of the entrance is too big. At such places the installation of the Rolling Shutter is not possible thus Shutter Gates are installed. Ideal for Jewellery Showrooms, round shape entrance. This shutters can also be made see through using perforated sections. The standard heavy duty top track made from M.S. & bright bar is to make strong and smooth operations.

## ROLLING GRILLS

The Rolling Grills exactly work like the rolling shutters. Unlike the rolling shutters, the Rolling Grill Doors are meant for the interior use. We offer automatic Rolling Grills that are quite popular among the various industries and business houses. The bodies of the Rolling Grills are manufactured from the best quality metals which ensure long lasting performance. Moreover, these Rolling Grills are very easy to operate and install.

## SLIDING GATE

Automatic Gates are made for modern designs and countless combinations meeting the needs of modern architectural buildings. Gates made of Steel, aluminum & Stainless Steel in vertical structure combined with architectural elements, which renders them a true jewel placed at your entrance. High standard aesthetics and simple lines forming a modern construction.

## SWING GATE

Single or Double-leaf gate is a solid structure mounted to steel or brick posts by means of assembly plates the leaves operate on hinges installed in the axis of the gate depending on the design. The gate may be filled with steel sections or bars symmetrically divided leaves; passive leaf is equipped with a vertical bolt. The gates can be designed to swing either inside or outside.

## BOOM BARRIERS

Automatic barriers have been designed in 2 series and represent the ideal solution for all automation used in residential, condominium, commercial and industrial car parks. Highly successful, the barriers for motorway car parks, are fast and integrated with Vehicle Priority Systems. All of the versions have been developed with a modern design and are strong with a low aesthetic impact.
